## DORMER CABIN L

The Dormer Cabin Large is the perfect structure to offer your customers a high-end hotel experience in the middle of nature. The structure comes with a sleeping room for 2 persons and a luxurious bathroom. This can be an outside bathroom for warmer regions or a closed one for areas with more unpredictable weather.

The structure can be created in many different roof colors. Also for the sides we offer a number of possibilities; from closed sides as showed on the picture to sides with mesh and steel frames combined with windows. This makes that we can adjust the structure based on your specific wishes and circumstances.

### Materials

The outerskin of this structure is made from PVC. This means that the structure complies to the European standards for fire retardant and is easy to clean.
