

CURVO

aesthetic solutions for thresholds and transitions

Curvo aluminum threshold transition profile stands out with its easy installation advantage and color options suitable for parquets. It covers the gaps between flooring or door threshold transitions with its oval form, hiding any application defect. It is also used as a separator frame in floor applications.

Curvo has matte anodized, bright anodized, satin chemical bright anodized and electrostatic powder painting options. While silver, yellow, inox, bronze and black anodized color coatings are available, it can also be painted to the desired RAL code with electrostatic powder painting.
